

EALA MISSION & KEY THEMES

The Educating All Learners Alliance (EALA) is an uncommon coalition of organizations committed to meeting the needs of all students—especially those students with disabilities and learning differences.

A Network that Delivers.

We unite organizations and groups that rarely sit at the same table—parents, educators, service providers, policy experts, and organizational leaders—and bring them into alignment around shared goals and real-world challenges. This isn't collaboration for show. It's about results.

Insights that Matter.

We don't rely on theory. We listen to those on the ground—parents, teachers, and providers—and bring their firsthand knowledge to the forefront. These insights drive smarter decisions and keep our network rooted in evidence and reality.

Trusted & Focused.

We've earned trust by staying above politics. As a nonprofit, we deliver open-access, high-quality tools that are grounded in facts and built to serve.

Built to Strengthen an Ecosystem.

Through targeted initiatives like Community of Action, New Champions Fund, and School Study Tours, we help our partners grow stronger and go further. Our role is to accelerate their efforts and help them tailor what works to fit their unique needs.
